SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks/Libraries: React.js, Next.js, TailwindCSS, Node.js

State Management: Redux Toolkit, React Context API

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Figma

Testing: Jest, React Testing Library

PROJECTS

NETFLIX AI

REACT, REDUX, FIREBASE AUTH, TAILWINDCSS, TMDB API, GEMINI API

A Netflix-inspired streaming platform with Firebase authentication, AI-powered movie search, and multi-language support.

- Built a Netflix-inspired streaming platform with Firebase Authentication, TMDB API integration, and AI-powered movie search using Gemini API.
- Implemented complete authentication flow including Sign Up, Sign In, Sign Out, session persistence, and protected routing with React Router DOM.
- Managed global user state using Redux Toolkit and handled real-time auth state updates with onAuthStateChanged.
- Developed reusable movie components and custom hooks for fetching Now Playing and Popular movies from TMDB API.
- Designed a responsive UI using TailwindCSS with trailer backgrounds, movie grids, gradient overlays, and multi-language support.

STREAMLY

REACT, REDUX TOOLKIT, TAILWINDCSS, YOUTUBE DATA API V3

A YouTube-inspired video streaming platform featuring real-time search, video playback, nested comments, subscriptions, likes, and live chat functionality.

- Built a YouTube-inspired single-page application using React, Redux Toolkit, and the YouTube Data API v3 to deliver real-time video content and playback experiences.
- Engineered a debounced search system with Redux-powered caching, reducing redundant API calls while providing real-time search suggestions.
- Implemented recursive comment rendering to support deeply nested discussion threads through a scalable component-based architecture.
- Developed a simulated live chat system using Redux state management with bounded-memory queue optimization to prevent unbounded state growth.
- Designed subscription, like/unlike, watch page, and responsive sidebar features while maintaining modular state management through independent Redux slices.

FOOD ORDERING APP

REACT, REDUX TOOLKIT, VITE, JEST, REACT TESTING LIBRARY

A full-featured food ordering SPA with cart management, live restaurant listings, and a comprehensive test suite.

- Developed a food ordering SPA with live restaurant listings, cart management, and responsive UI design.
- Built reusable React components including Header, Restaurant Cards, Search, Cart, and Footer with dynamic API-based rendering.
- Implemented Redux Toolkit for cart state management including add-to-cart, quantity updates, and cart summary features.
- Used React Hooks and React Router DOM for state handling and client-side routing.
- Configured Unit and Integration testing using Jest, React Testing Library, and jsdom.

EDUCATION

Bachelor of Computer Applications (BCA)
SRM UNIVERSITY

Delhi, India | 2025
